WOOL FELT

## ACOUSTIC FELT WALLS

Beautify your interior with Feltmen wool felt for Wall covering, Panels and Flooring solutions.

- A wide range of designs and colours possible to suit your scheme
- Soft to touch
- Hard wearing
- Acoustically beneficial
- Insulating
- Manufactured from a natural renewable resource
- Bio-degradable
- Naturally fire resistant
- Humidity regulating
- Easy to clean
- Anti-bacterial
- Air-purifying

Feltmen produces the wall covering, panels, and flooring in an own manufacturing facility in the Netherlands.

We can provide a complete package including:

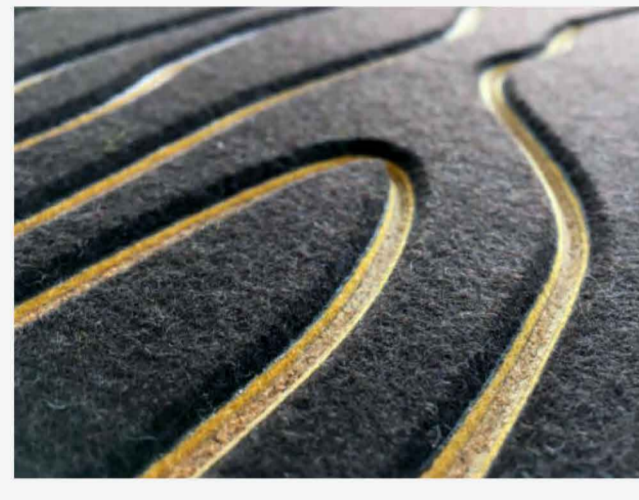

- Rail systems
- Mounting systems
- Magnetic, self-adhesive or velcro backing options

We also have experience in using other natural materials in our products including cork, coir, recycled leather and recycled jeans. We integrate these materials with the wool felt to make exciting new design combinations. Bespoke design is standard.

Feltmen wool felt is used in a wide range of applications including commercial offices, public spaces, retail outlets, hospitality and education environments.

We also love to use other natural products such as cork and coir and recycled leather and recycled jeans in combination with wool felt.

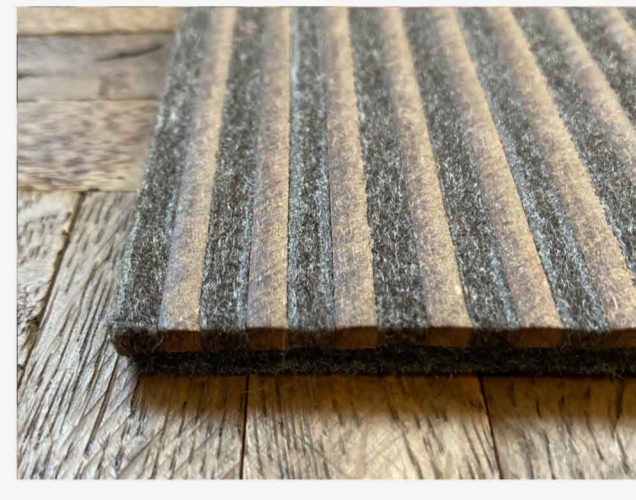

### CORK

### COIR

### LEATHER

## PANELS

Feltmen panels can be used to divide space.

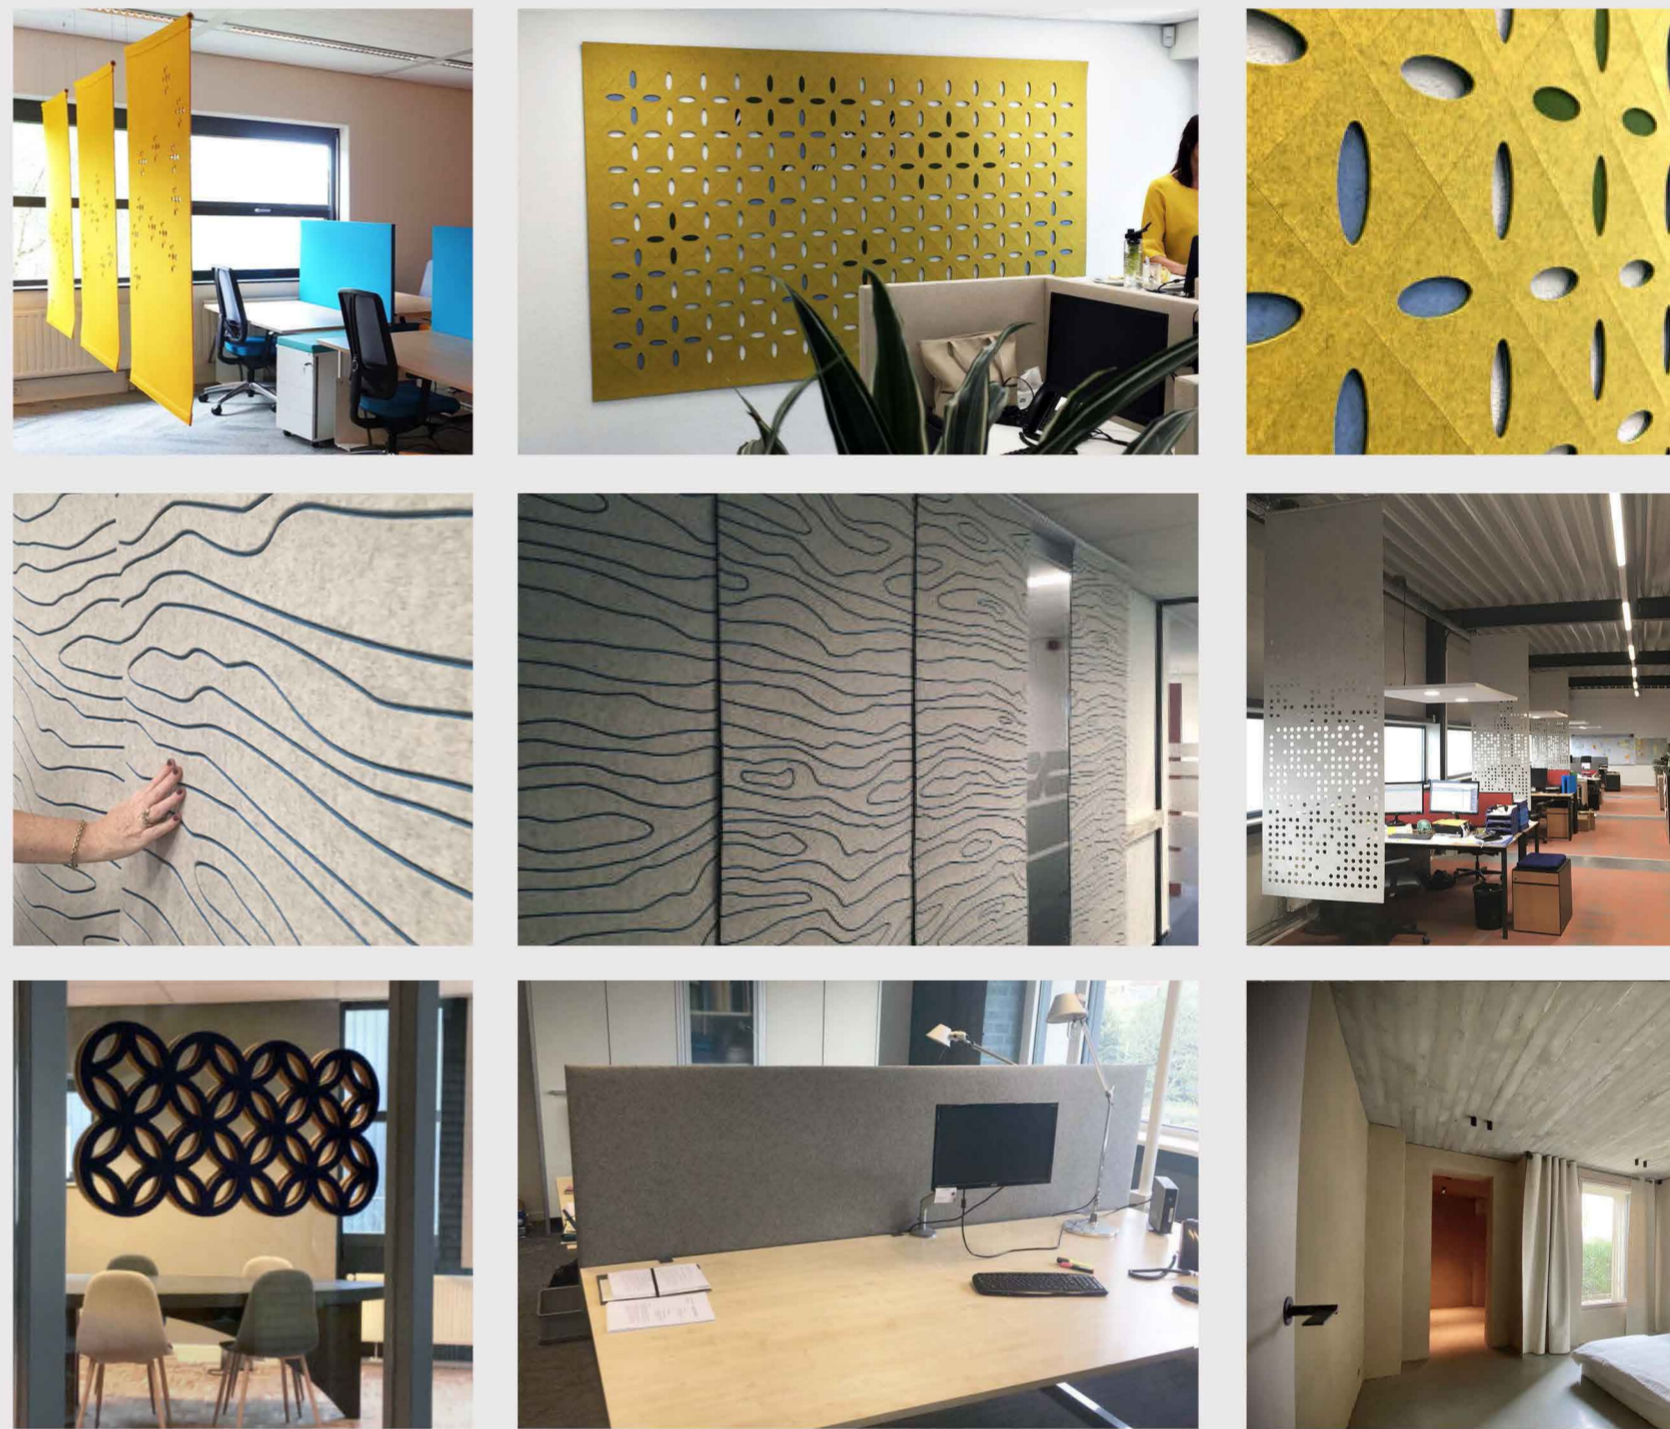

Room division, sound absorbency and branding are all combined into one product solution.

You create your own design or draw upon the knowledge of our designers to help you realise your design aspirations.

Panels can be single or multi-layered.

We deliver the panels with the hardware you need to mount to the wall, ceiling or even attach to your desk.

Our rail system with up to five tracks allows you to easily slide the panels to close off or open space. This flexibility allows them to be arranged to suit the function of the space at a specific time.

## STRIPED WOOL FELT

This product was originally designed as rugs for high traffic flooring. The 100% wool felt floor is highly durable material. The striped wool felt is also now often specified as a wall covering which provides a striking and durable design solution.

There are unlimited options in colour combinations and sizes.

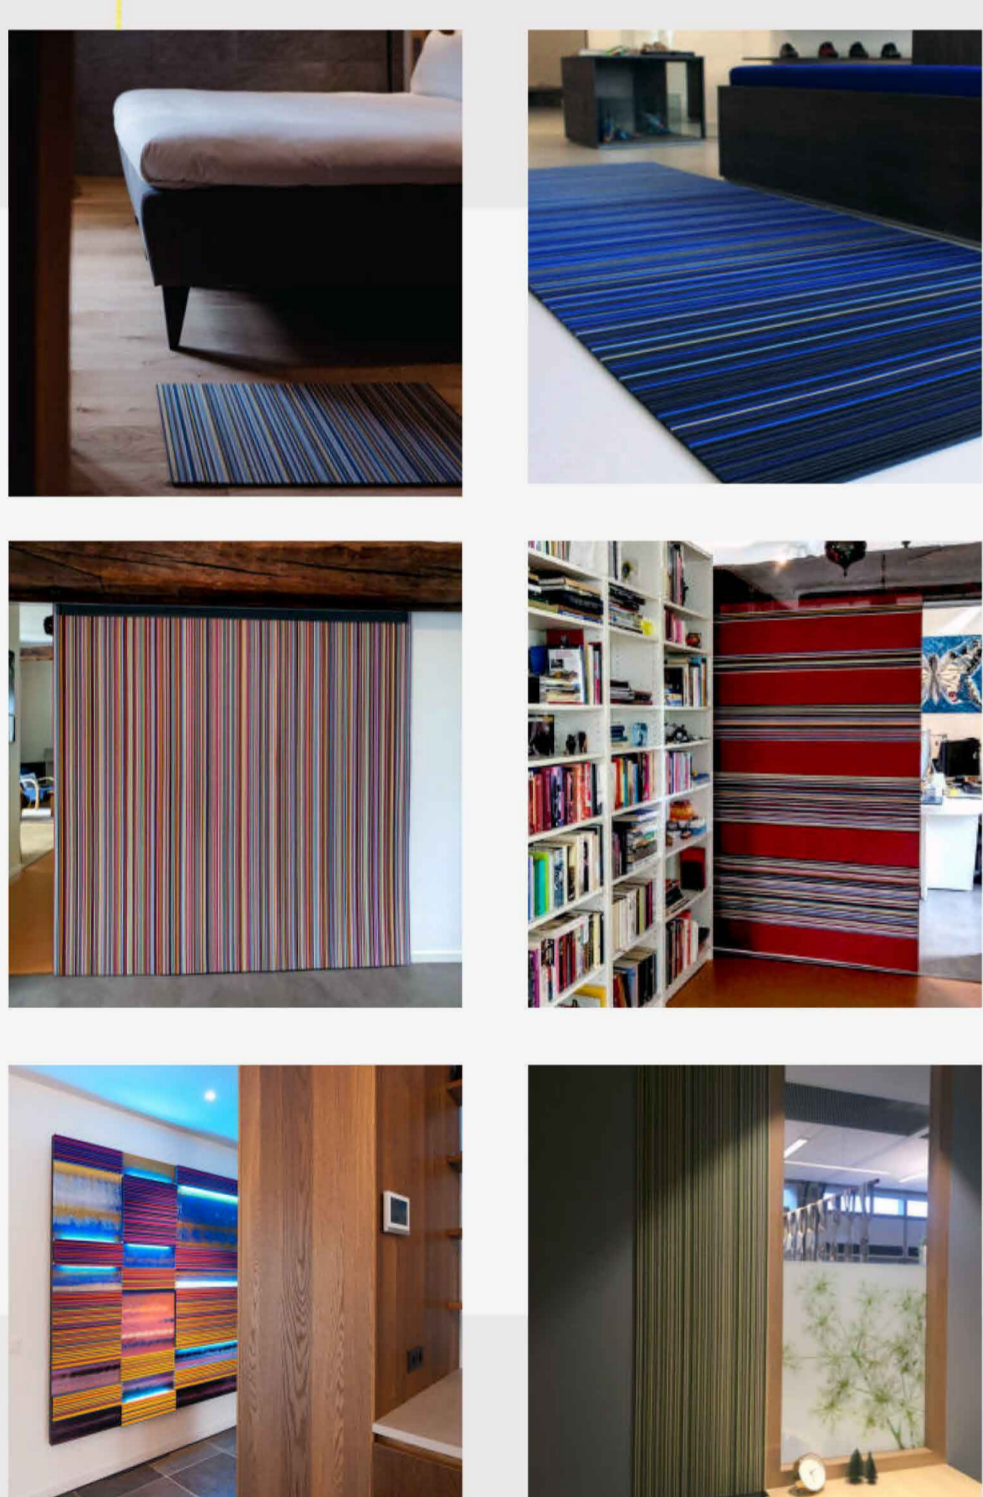

The introduction of rugged recycled leather stripes combined with the wool felt can add an interesting twist to the striped wool felt.

Whether the striped wool felt is used on the floor or wall, it has a high level of sound absorbency and helps to reduce reverberation in open space.

The flooring comes as standard with anti-slip felt backing.

The wall covering has an optional self adhesive, magnetic or velcro backing.

We can produce in large sizes to cover entire walls and floors, or in smaller sizes which are often used as pinboards and rugs.

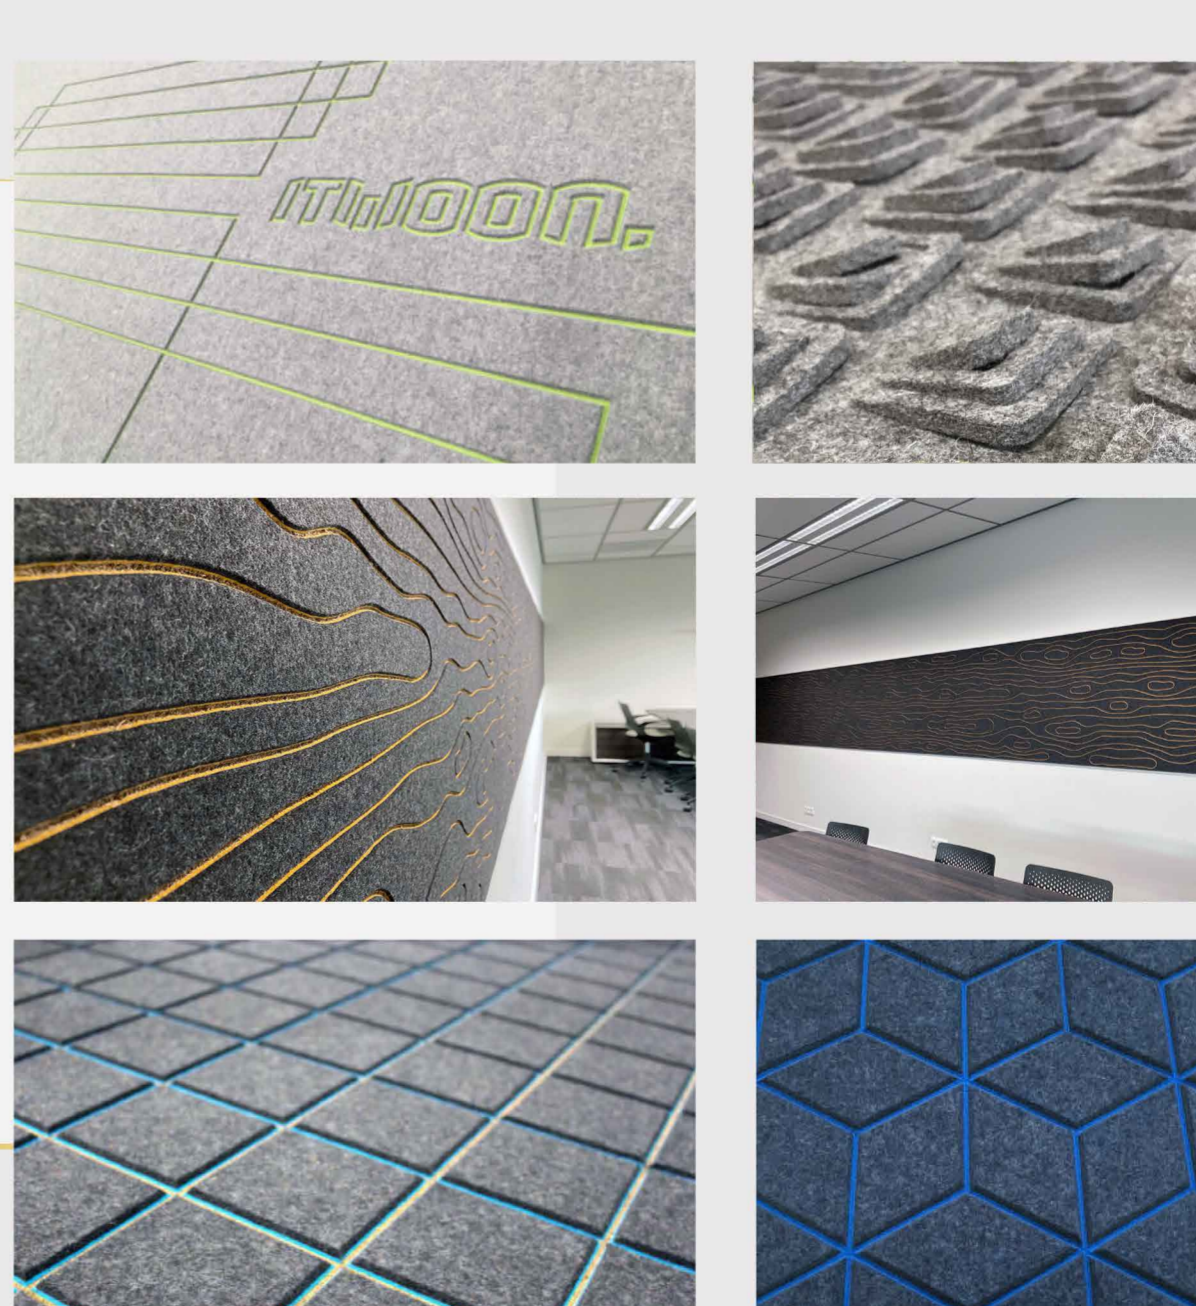

## CARVED WOOL FELT

Our unique production techniques allow us to shape fantastic carved wool felt surface landscapes.

The Feltmen bespoke design service gives you the opportunity to create state of the art interior and stylish design branding.

The fixing options are the same as the hanging panels and this allows the product to be a hanging panel, sliding panel or it can be fixed directly to the wall.

## COLOURS

The Feltmen colour collection, 100% Merino wool felt.

Premium 100% natural Merino wool felt is an ultra-strong non-woven textile with unique features. These characteristics mean that it is used extensively in a wide range of industries including interior design, decoration and also the fashion industry. The melange colours have a small percentage of Karakul wool fibre.

Choose one of the standard colours from our range or have your own individual colour created in our colour laboratory.

Wool felt is available in two thicknesses: 3 mm and 5 mm. The 3 mm comes in rolls of 185 cm width, 5 mm in 150 cm width. (It is possible to produce in other thicknesses and widths)

Wool felt can be specified by the running metre to suit your scheme design and the dimensions of the space.

Feltmen wool felt has an above average density of 0,3 (equals 300 grams per square metre at 1 mm thickness) making it extremely durable.

Feltmen offers you these unique material characteristics. Combined with our design experience and flexible production techniques we are able to manufacture a wide range of solutions.
